

Online Forum Project Proposal

Project Name:

Online Forum - ASP.NET + VB.NET + SQL Server.

Abstract:

The popularity of internet and increase in use of internet, there is lots of scope in online bulletin board system which known as form. Proposed eForum is a web based forum which allows user to create subject, topics, post their message.

eForum version 1.0, one of the best web based bulletin board systems ever developed. A complete board system (forum) that allows the user access to a friendly and intuitive interface online. It offer complete web based forum administration

Advantages

Complete web based administration, Unlimited Forums and post. Forget Password - Password will be send to member directly to his or her email id. The posting page has several features, such as: use of smiles, formatting options like bold, italics, underline, font color. Auto-insertion of the Forum Code around the selected text. Unanswered Topics - All unanswered topics are displayed in the forum home page. Member can view the unanswered topics easily..

Project Scope:

1. Admin Web based bulletin board (forum) system: eForum offer complete web based administration like Complete web based administration, Unlimited Forums, Unlimited moderators, Locking/UnLocking/Deleting of Categories, Forums, Topics and Members by Moderators and/or Admins, Registration functions, Enable/Disable Registration, Restricted/Open Registration
2. Web based bulletin board (forum) system: Web based bulletin board (forum) system is used to register new member, display topics and post. Allow to create new topics, post message, reply post

Modules:

Forum Home Page, Login Page, Member Registration, My Account, Change Password, Post Page, Reply Page, Search Member, Member List, Member Details, My Post, Admin Page, etc.

To buy complete ready to submit synopsis, project report, source code, and data base script.

Please contact **R. M. Solution.** 📞 +91-9920329254, 📠 +91-22-28550428,

🌐 www.readymadeproject.com

Software Requirements:

- ASP.Net, VB.Net
- Visual Studio 2010 / 2012 / 2015 / 2017
- SQL Server 2008 / 2014 or Higher

Hardware Requirements:

Processor: Preferably 3.0 GHz or Greater.

RAM : 1 GB or Greater.

Limitations of the Software:

This project was developed to fulfill user and business requirement; however there is lots of scope to improve the performance of the Online Forum System in the area of user interface, database performance, and query processing time. Etc.

Future Enhancements:

- Support more BB code for reply formatting.
- Social plug-in, auto login with Facebook, Google account.

Project Details:

- No of Form, Pages, Reports in project source : 25
- No of database tables : 6
- No of pages in project report : 134
